CAREER OBJECTIVE

To apply my foundational knowledge in VLSI design, digital electronics, and semiconductor concepts to work on real-time chip design and verification projects. I seek an opportunity in a VLSI organization where i can enhance my skills in industry-standard tools and methodologies, supporting the organization's technological growth and my professional development.

EDUCATION

Bachelor of Technology (Electronics and Communication Engineering) in GMR Institute of Technology, Rajam — Dec2025 pursing CGPA9.2 /10

INRERMEDIATE — Sep 2021– May 2023

Sri GCSR Junior college, Rajam — Percentage – 95%

10TH Class — June 2020– Apr2021

Vijnana Vihara residential school, Vishakapatnam — Percentage – 84%

PROJECTS

UART PROTOCOL IMPLEMENTATION

Implemented a UART (Universal Asynchronous Receiver Transmitter) protocol using Verilog HDL in Quartus Prime by designing transmitter and receiver modules with baud rate generation and control. The design was verified through simulation to ensure accurate timing, correct start/stop bit detection, and reliable serial data transmission and reception.

SMART ROAD MONITORING SYSTEM

Developed a Smart Road Monitoring System using ESP32 and multiple sensors to detect potholes, obstacles, and road surface conditions. Integrated ultrasonic, IR, and vibration sensors to capture real-time data and monitor road quality. The system was designed to improve road safety by identifying damaged areas and enabling timely maintenance through continuous monitoring.

LIBRARY MANAGEMENT SYSTEM

Developed a Library Management System using Java by implementing object-oriented programming concepts to manage book records and user data efficiently. The system includes functionalities such as adding, deleting, searching, and updating book information. The application was designed to ensure organized data handling and improve the efficiency of library operations.

SKILLS

- Programming Languages: Python, Java, C.
- Tools: Multisim ,Matlab ,Scilab, Cadence, Vivado,VS Code,Jupyter .

INTERNSHIPS

ABHYASA SEMICON TECHNOLOGIES JUNE – JULY 2025

Successfully completed a certified internship program in VLSI Technologies, gaining hands-on experience and practical knowledge in VLSI basics and Verilog and gained a practical and theorical knowledge.

TERM PAPER

Implementation of reversible mux and demux using IBM quantum

CERTIFICATIONS

- Introduction To GENARATIVE AI– COUSERA
- Prompt Engineering For ChatGpt-COURSERA
- 8051 Microcontrollers–UDEMY
- Chip Engineeering -L&T
- Deep Learning-NPTEL
- Sensors, Actuators & IoT Unleashed – Embedded Board Essentials-GMRIT

STRENGTHS

- Strong analytical and logical thinking.
- Quick learner of new technologies.
- Passionate about creating real-time embedded systems from scratch.
- Work well both in a team and on my own.

LEADERSHIP & ACHIVEMENTS

- ISTE Coordinator, GMR Institute of Technology – Present,
- Central Level Coordinator, STEPCONE 2025 – National Technical Event at GMRIT,
- Organized technical and fun events every month with full team coordination, □ A Radio Jockey at GMRIT FM Radio-90.4MHz.
- Participated in MEDTECH expo -JNTUGV

□ HOBBIES & INTERESTS

- Learning new Programming skills
- Craft works
- Listening to Music
